

Haythem Zaaber

Full-Stack Developer | Software Engineer and AI Enthusiast

📍 Sousse, Tunisia — 📞 +21696720146 — ✉ haythemzaaber28@gmail.com — 🌐 linkedin/haythem-zaaber/ — 🏠 github/HaythemZaaber

Summary

Dynamic Full-Stack Developer with 4+ years of experience, specializing in creating scalable web applications and real-time data solutions. Proven expertise in Next.js, NestJS, React, and Node.js, delivering innovative and future-ready digital solutions.

Skills

- **Programming Languages:** TypeScript, JavaScript (ES6+), Java (Object-Oriented Programming), Python, PHP, C, C++.
- **Backend & Architecture:** Node.js, NestJS, Laravel, Spring Boot, RESTful APIs, GraphQL, Microservices architecture.
- **Frontend & Web:** React.js, Next.js, Angular, Redux Toolkit, Zustand, HTML5, CSS3, Tailwind CSS, Material-UI, Ant Design.
- **Databases & ORM:** PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM, Mongoose.
- **DevOps & Tools:** Docker, CI/CD Pipelines (GitHub Actions, GitLab CI), Git, Linux, Postman, Apollo Server, Socket.io.

Experience

End of Studies Internship (Remote) – Next.js, NestJS, Prisma, PostgreSQL

Mar 2025 – Sep 2025

It'sGeeks | Paris, France

- Engineered a modular e-learning ecosystem utilizing Next.js and NestJS, featuring an automated Identity and Certification Verification system using Python-based data extraction.
- Designed a complex relational database schema with Prisma ORM to handle social features (stories/reels), AI-driven recommendations, and high-concurrency course management.
- Deployment and DevOps: Containerized the entire microservices architecture using Docker and orchestrated deployments via CI/CD pipelines (GitHub Actions) to a cloud-based VPS.
- Implemented Nginx as a reverse proxy with SSL termination and optimized system performance through automated database migrations and environment-specific configuration management.

Frontend Developer (Full-Time, On-Site) – React, Next.js, TailwindCSS

Nov 2024 – June 2025

Niagara Tech | Sousse, Tunisia

- Led the migration of legacy web interfaces to a modern React/Next.js stack, improving page load speeds and enhancing mobile responsiveness for diverse user devices.
- Collaborated with backend teams to consume RESTful APIs, implementing robust state management with Redux Toolkit to handle real-time data synchronization.
- Optimized UI performance by implementing code-splitting, lazy loading, and advanced CSS/Tailwind techniques for high-performance dashboard analytics.

Full-Stack Developer Internship (Remote) – Next.js, NestJS

Jul 2024 – Aug 2024

It'sGeeks | Paris, France

- Designed a scalable expert search engine allowing learners to find verified mentors across global time zones.
- Built an intelligent scheduling module to manage 1-on-1 sessions, handling complex time-zone conversions and automated email notifications for participants.

Full-Stack Developer Internship (On-Site) – Angular, Laravel, MongoDB

Jul 2023 – Sep 2023

Nachd-IT | Sousse, Tunisia

- Architected a digital platform to automate university internship workflows, replacing manual paper processes with a real-time tracking system for students and administrators.
- Developed custom reporting tools to generate performance metrics, reducing administrative errors in internship evaluation.

Education

Software Engineering

2022 - 2025

Higher Institute Of Applied Science And Technology Of Sousse (ISSAT)

Integrated preparatory cycle

2020 - 2022

Higher Institute Of Applied Science And Technology Of Sousse (ISSAT)

Projects

Scalable E-Commerce Microservices | *NestJS, Prisma, PostgreSQL, Docker*

- Architected a modular backend system for an e-commerce platform using NestJS, focusing on decoupling the order processing and inventory services.
- Integrated Docker for containerization and GitHub Actions for CI/CD, ensuring consistent deployment environments.

Automated Identity and Certification Verifier | *Python (OpenCV, OCR), NestJs, PostgreSQL, Prisma*

- Engineered an automated onboarding pipeline to verify instructor credentials by extracting data from government IDs and academic certifications.
- Developed a metadata extraction engine to validate document authenticity, ensuring only verified experts can publish content on the platform.
- Built a secure administrative dashboard for manual secondary review, featuring encrypted document storage and role-based access control.

Real-Time Collaboration Tool | *Next.js, Socket.io, Tailwind CSS, Redis*

- Built a project management application featuring real-time chat and document editing updates using WebSockets (Socket.io).
- Optimized state management with Zustand and implemented Redis for session caching to improve user response times.

Performance Monitoring Dashboard | *React, Chart.js, Express, MongoDB*

- Engineered a data visualization dashboard to monitor system metrics (CPU usage, API latency) and display them in interactive graphs.
- Implemented JWT-based security and RESTful API endpoints for secure data transmission between the server and the frontend.

Volunteering

Organizer | *Tunisia Dev Days*

Nov 2024

Intermediate web mentor | *Microsoft ISSATSo Club*

Sep 2023 – Sep 2024

Technical Lead for Web Operations | *IEEE ISSATSo Student Branch*

Nov 2022 – Dec 2023
